BLS 00-58 FOR RELEASE: Thursday, August 31, 2000

## RESULTS OF PAY SURVEY FOR THE HONOLULU, HAWAII METROPOLITAN AREA

Workers in the Honolulu, Hawaii metropolitan area averaged \$16.76 per hour during January 2000, according to a new survey released by the U.S. Department of Labor's Bureau of Labor Statistics (BLS). Regional Commissioner Stanley Stephenson reported that white-collar workers averaged \$20.40 per hour and accounted for 54 percent of the workers in the area. Bluecollar workers averaged \$15.39 per hour and represented 18 percent of those surveyed, while the remaining 28 percent worked in service occupations and earned \$9.70 per hour. (See tables 1 and 2.)

The National Compensation Survey (NCS) presents straight-time earnings for occupations in establishments employing 50 or more workers in private industry and State and local governments. It excludes agricultural establishments, private households, the selfemployed, and the Federal Government. The survey studied 211 firms representing 202,400 workers in the Honolulu metropolitan area consisting of Honolulu County. Nearly 76 percent of those represented worked in private industry.

In the Honolulu metropolitan area, wages were published for over 80 detailed occupations. (See table 2.) Among white-collar workers, financial managers averaged \$34.65 per hour, computer systems analysts and scientists \$26.30, social workers \$20.55, and hotel clerks \$13.25. Blue-collar occupations included heavy equipment mechanics earning \$27.92 per hour, construction laborers at \$20.65 and stock handlers and baggers at \$9.96. In the service occupations, cooks averaged \$12.04 per hour, janitors and cleaners \$10.19, and baggage porters and bellhops \$5.47.

The NCS also provides broad coverage of selected occupational characteristics. (See tables 3 and 4.) For example, full-time employees in Honolulu averaged \$17.77 per hour, while part-timers earned \$9.48. Union workers in blue-collar jobs averaged \$17.76 per hour; while their non-union counterparts earned \$12.15. Private industry workers at establishments employing 50-99 workers averaged \$14.95 per hour, while those in establishments with 500 or more employees earned \$17.06. Average rates of pay are also available for levels of work within an occupation based on knowledge, skill, independent judgment, supervision received and other factors required on the job. These selected characteristics allow for comparison of occupations with similar requirements.

Data provided by the NCS may be used by businesses for establishing pay plans, making decisions concerning plant relocation, and in collective bargaining negotiations. Individuals may use such data to help choose potential careers. The NCS is part of a statistical program that will eventually integrate three separate surveys of wages and benefits into one comprehensive compensation program. The survey increases the amount of wage data available to businesses, employees, and the public, and reduces the time required of business establishments responding to BLS compensation surveys.

## **Survey Availability**

Complete survey results are contained in the National Compensation Survey, Honolulu, HI, January 2000, (Bulletin 3100-41). Copies of survey tables are available on the Internet in both text and PDF formats at http://stats.bls.gov/comhome.htm and from the Bureau's fax-on-demand service, Ready Facts, by dialing 415-975-4567 and requesting documents 9507. For further information or personal assistance contact the San Francisco Regional Office at 415-975-4350. Bulletins may be purchased for \$7.00 from the BLS Publications Sales Center, 230 South Dearborn Street, 9<sup>th</sup> Floor, Chicago, IL 60604. Telephone orders using MasterCard or Visa credit cards are accepted at 312-353-1880 between 8:00 a.m. and 3:00 p.m. Central Time.

- 1 Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, and holidays; nonproduction bonuses; and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.
- 2 The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a "confidence interval" around a sample estimate. For more information about RSEs, see appendix A in bulletin.
- 3 Mean weekly hours are the hours an employee is scheduled to work in a week, exclusive of overtime.
- 4 Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Union workers are those whose wages are determined through collective bargaining. Wages of time workers are based solely on hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production bonuses.
- 5 A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. See appendix B in bulletin for more information.
- 6 Classification of establishments into goods-producing and service-producing industries applies to private industry only.
- 7 Establishments classified with 50-99 workers may contain establishments with fewer than 50 due to staff reductions between survey sampling and collection.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. IN THIS SURVEY, THE NONRESPONSE RATE FOR PRIVATE INDUSTRY EXCEEDED REGULAR SURVEY STANDARDS FOR PUBLICATION. ACCORDINGLY, USERS SHOULD INTERPRET THESE RESULTS WITH THIS LIMITATION IN MIND.

<sup>1</sup> Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria, and n.e.c. means not elsewhere classified. Overall occupational groups may include data for categories not shown separately. IN THIS SURVEY, THE NONRESPONSE RATE FOR PRIVATE INDUSTRY EXCEEDED REGULAR SURVEY STANDARDS FOR PUBLICATION. ACCORDINGLY, USERS SHOULD INTERPRET THESE RESULTS WITH THIS LIMITATION IN MIND.

<sup>2</sup> All workers include full-time and part-time workers.

<sup>3</sup> A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. See appendix B in the bulletin for more information.

<sup>4</sup> The relative standard error (RSE) is the standard error expressed as a percent of the estimate. It can be used to calculate a confidence interval around a sample estimate. For more information about RSEs, see appendix A in the bulletin.

<sup>1</sup> Earnings are the straight-time hourly wages or salaries paid to employees. They include incentive pay, cost-of-living adjustments, and hazard pay. Excluded are premium pay for overtime, vacations, holidays, nonproduction bonuses, and tips. The mean is computed by totaling the pay of all workers and dividing by the number of workers, weighted by hours.

NOTE: Dashes indicate that no data were reported or that data did not meet publication criteria. IN THIS SURVEY, THE NONRESPONSE RATE FOR PRIVATE INDUSTRY EXCEEDED REGULAR SURVEY STANDARDS FOR PUBLICATION. ACCORDINGLY, USERS SHOULD INTERPRET THESE RESULTS WITH THIS LIMITATION IN MIND.

<sup>2</sup> A classification system including about 480 individual occupations is used to cover all workers in the civilian economy. See appendix B in the bulletin for more information.

<sup>3</sup> Employees are classified as working either a full-time or a part-time schedule based on the definition used by each establishment. Therefore, a worker with a 35-hour-per-week schedule might be considered a full-time employee in one establishment, but classified as part-time in another firm, where a 40-hour week is the minimum full-time schedule.

<sup>4</sup> Union workers are those whose wages are determined through collective bargaining.

<sup>5</sup> Time workers' wages are based solely on an hourly rate or salary; incentive workers are those whose wages are at least partially based on productivity payments such as piece rates, commissions, and production bonuses.

Table 4. Establishment employment size: Mean hourly earnings(1) by occupational group,(2) private industry,

National Compensation Survey, Honolulu, HI, January 2000

Tvational Compensation Gurvey, Honolaid, Til, Gandary 200	Full-time and part-time workers
